

Functional Horse Training

Combining art with science to establish optimal movement

2-DAY WHOLE HORSE DISSECTION

ONLINE VERSION

“Simplicity is the greatest achievement of knowledge but simplicity without knowledge is the greatest cause of equine injuries” - Cornille 2012

WHOLE HORSE DISSECTION

Have you always wanted to learn from the horse “inside-out”? Then join us for the unique experience of an online whole horse dissection.

The horse is a fascinating being. We can build a lifelong partnership in true harmony with a creature that is so majestic and powerful. At the same time, the journey can be complex as a horse can't speak our human language and we often misread / don't understand the signs what horses are trying to tell us and. We often hit many bumps in road like injuries, trauma, fear, stress, disconnection etc.

Although issues are mostly hidden in a deep place, we're often able to see and feel them from the outside. When you pay attention to these details, you'll be able to discover a treasure of information right under your eyes.

This dissection is a must for ANYONE involved in horses some way as it allows you to understand how they are built, function and what they need to live a healthy happy life as well as optimize performance. The dissection will have a very interactive character where you can observe, learn, and ask questions.

Scroll down for all the necessary information of this unique experience that will change the way you look at horses.

Format

During this course you'll make a journey through the life story of the horse and learn to read it 'inside-out'. The facts will be unraveled before your eyes as the horse will tell its life story. By doing so, we'll give the voice back to the horse. The horse will be our greatest teacher during these 2 days, and we'll be honored to guide you through.

Under the experienced guidance of the team of Equinestudies (educated by Sharon May-Davis) you'll be investigating the different layers of the horse, how they function separately and how it's intertwined with the whole body at the same time. At the same time, the latest scientific research will be presented to you.

The dissection will be filmed by a highly skilled professional video team to offer you the highest quality in front row seat.

WHOLE HORSE DISSECTION

The dissection is filmed from Cape Town South Africa via an offline server so that there are no internet connection problems and super smooth streaming!

The dissection will be filmed in segments of 1,5 hours with breaks in between where the team while the team is prepping the next layer allowing you to enjoy a small break to refresh your brain and enjoy some drinks / food.

This online dissection offers you a unique front row seat as there are no other participants in the room (just the dissection team). The high-tech cameras can give you super sharp overall and zoomed in shots to really get a full 3D experience.

WHOLE HORSE DISSECTION

You can join this dissection from the comfort of your own home enjoying the following benefits:

- ✓ Front row seat (no one in front of you)
- ✓ Isolated environment for optimal learning
- ✓ The possibility to rewind / replay

Program details

For 2 days, we will tackle different parts of the body layer-by-layer.

Day 1, we will study the head (including hyoid apparatus), neck, should, front limbs and hooves. Day 2, we will study the back, hindquarters, hind limbs, and organs (including stomach, brain)

Subjects in this course include:

Fascia. • Muscle layers and their function and connections • Joints and attachment of muscles • Tendons and ligaments • Veins • Head & hyoid • Lymph nodes • Organs • Brain & Nervous systems • The effect of head and neck positions and Tack • The recoil system • Thoracic and Sacro-Pelvic sling * Skeleton and vertebral column.

An extensive manual of 120 pages will be provided for. In additional, a professional photographer will make some beautiful pictures that will be provided for free after the course together with a complete file of all the findings.

Extra details

The course will be given in English

This course includes:

- 1) An extensive manual on Anatomy & Biomechanics (120 pages)
- 2) Presentation of horse(s) [it's life and assessment videos]
- 3) 2 days Whole Horse Dissection (& Asking Questions!)
- 4) 2 bonus videos of dissection practicums (head and neck positions & brain)
- 5) Access to closed Facebook group community
- 5) After course materials [Professional photos, summary & additional videos]

During the dissection, certain boney pathologies are hard to discuss due to the presence of soft tissue.

Therefore, after the dissection is completed, the skeleton of the horse will be cleaned and prepared.

This process will take about 8-10 weeks. Once the bones are ready, you will get an automatic video with another high-quality video where the skeleton will be fully analyzed and explained offering you another deeper layer of learning.

Livestream dates:

September 15-15, 2023, 09.30-16.30 CEST

Replay:

September 14, 2023, 22.00 CEST – January 14, 2024, 22.00 CET

The replay will stay available for 4 months after the live stream has finished. Until 6 weeks after the live stream has finished you can submit questions to the team in the designated Q&A function of the replay. Questions will be answered within 48-72hrs by affiliated team members / experts of Equinestudies and Functional Horse Training.

This course is exclusive for Functional Horse Training affiliates / students only with a maximum limit of 50 participants.
