

ONLINE LIVE WHOLE HORSE DISSECTION

‘Simplicity is the greatest achievement of knowledge but simplicity without knowledge is the greatest cause of equine injuries’ (Cornille 2012).

FORMAT

The horse is a fascinating being. We can build a lifelong partnership in true harmony with a creature that is so majestic and powerful. At the same time, the journey can be complex as a horse can't speak our human language and we often misread / don't understand the signs what horses are trying to tell us and. We often hit many bumps in road like injuries, trauma, fear, stress, disconnection etc.

Join us for the unique opportunity to participate in a Whole Horse Dissection LIVE from your own home to study the horse 'inside-out'. It will be very interactive as if you're in the room with us and you can ask questions ... all day!

COURSE DETAILS

The full event will take place from 24th – 26th of September 2020.

Whole Horse Dissection

24th – 09:00 until 17:00

25th – 09:00 until 17:00

26th – 09:00 until 17:00

Each day we will tackle different parts of the body.

Day 1 we will study the head, parts of the neck, the shoulder, the front limb and the digestive system.

Day 2 we will study the deep layers of the neck, shoulder, front limb and hoof. We will also perform an exercise showing the effects of the bit and different bridles, including a bitless bridle, on the hind end and back. We will also start with the organs and the beginning of the back.

Day 3 we will study the back, the hind end and hind ends. We will also perform an exercise that shows the effects of a saddle and rider.

Although issues are mostly hidden in a deep place, we're often able to see and feel them from the outside. When you pay attention to these details, you'll be able to discover a treasure of information right under your eyes. During this module you'll make a journey through the life story of the horse and learn to read it 'inside-out'. The facts will be unravelled before your eyes and you're allowed to feel everything to develop a better understanding of this fascinating being 'horse'.

The dissection will have a very interactive nature with an entire team of specialists – a licensed vet, a dentist and a bodyworker - ready to answer all your questions and to perform practicals with you, including the effect of several bridles, bits and saddles on locomotion of the horse.

Topics that will be covered are: • Fascia • Muscle layers and their function and connections • Joints and attachment of muscles • Tendons and ligaments • Veins • Head, hyoid and nerves • Lymph nodes • Vertebrae's • Organs • Tack influence on movement

An extensive manual of 120 pages will be provided for. On top, a professional photographer will make beautiful pictures that of all-important structures and findings will be provided for free after the module.

INVESTMENT

For tax and insurance purposes, prices will be charged in EUR. Upon purchase of a ticket, it will automatically be converted into the local currency of your country by your bank.
